This document provides the requirements and design details of the PROJECT. The following table (Table 1) should be updated by authors whenever major changes are made to the architecture design or new components are added.

Table 1: Document Update History

Date	Updates
11/13/2022	Ravi Kiran Kunsoth: First test update. Added chapters (Chapter ??).
12/16/2021	DDM: Modified drawings of Figure ?? to highlight the new mask creation sub-class dmaRBMaskCreateMagicLasso (Chapter ??). Added two new chapters: dmaRBMaskCreateMagicLasso (Chapter ??) and dmaLassoInterpolate (Chapter ??) to capture the latest logic for background removal. A user uses the lasso around the object, or the average of 360 objects, and the magic lasso mask creation will interpolate the missing pixels and then use that as the background image.
12/16/2021	Initials: Modified drawings of Figure ?? to highlight the new mask creation sub-class dmaRBMaskCreateMagicLasso (Chapter ??). Added two new chapters: dmaRBMaskCreateMagicLasso (Chapter ??) and dmaLassoInterpolate (Chapter ??) to capture the latest logic for background removal. A user uses the lasso around the object, or the average of 360 objects, and the magic lasso mask creation will interpolate the missing pixels and then use that as the background image.

List of Figures

Chapter 1

Introduction

– *Ravi Kiran & Anita*

All projects should have a small introduction. Here we provide some example LaTeX commands. The first one is an example on how to introduce an EPS file as an image into the document.

More examples will be added later.

Hi there world!

Chapter 2

Scope

– *Ravi Kiran*

All projects should have a small introduction. Here we provide some example LaTeX commands. The first one is an example on how to introduce an EPS file as an image into the document.

More examples will be added later.

Hi there world! This is chapter 2

2.1 Test Section
